NX

We challenge the status quo to unlock INNOVATIVE solutions that boost electrification

NX is a technology company offering advanced electronics products for electrification. We are committed with democratising access to latest technology, reducing time to market and consistently offering close customer support.

POWER inverter family

Discover NX's wide-range inverter platform,
a cost-effective solution for any road,
off-road, air or marine mobility application.

ELECTRIFY WITH QUALITY

Achieving best-in-class efficiency ratings, we supply automotive grade products without the fixed costs of large automotive suppliers.

Designed for mass production and compliant with the highest safety standards, our products focus on power density, offering a power range from 5 kW to 350 kW

P

Up to
10kW

O

Up to
40kW

W

Up to
120kW

E

Up to
190kW

R

Up to
350kW

BMS Platform

Optimize your battery's performance and safety with our Battery Management System.

Ready to use flexible BMS system with automotive grade components and ASIL D certified microcontroller.

Each BMC can control up to 63 CMDs
Each CMD can monitor up to 18 cells

SoC, SoP, SoH

DeveLinkSTUDIO™

Battery Health Monitoring through Machine Learning

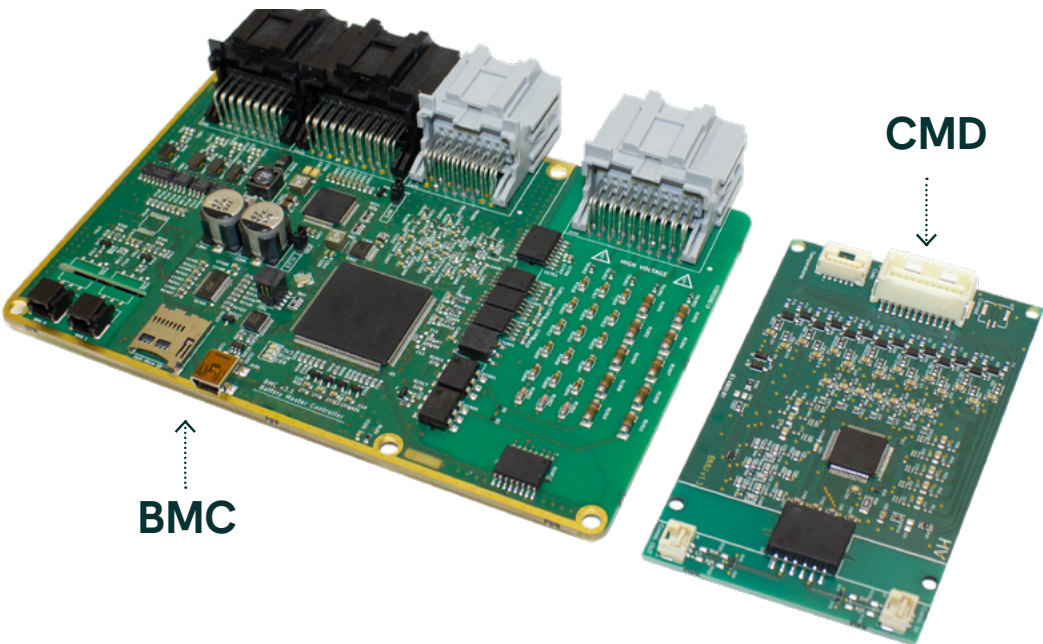

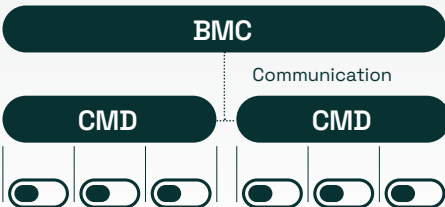

Tricore
ISO26262
ASIL D certified micro

Centralized architecture for LV

Distributed architecture for HV

Applications

Smart and efficient electric solutions to power tomorrow's mobility.

NX's scalable and modular technology enables a wide range of applications.

Motorcycle

Agriculture

Marine

Passenger Car

Heavy Duty
